

GI Conduit Flexible Pipe “GIF” is a robust and versatile pipe made from galvanized iron (GI), designed to provide enhanced protection for electrical wiring in various environments.

The GI material ensures excellent resistance to corrosion, while the flexible design allows it to be easily installed in both indoor and outdoor settings, even in confined or complex spaces.

This conduit is ideal for applications that require additional mechanical protection for cables and wires while maintaining flexibility.

Applications: Industrial Wiring, Commercial Building Wiring, Outdoor and Underground Installations, Automotive and Machinery Wiring etc.

GIF - GI Conduit Flexible
