

PVC Sleeving "SL" is a flexible and durable covering made from high-quality poly-vinyl chloride (PVC), designed to protect electrical wires and cables. Its excellent insulation properties and mechanical protection make it a versatile choice for a wide range of applications. PVC Sleeving is highly flexible, making it easy to install and adaptable for use in both residential and industrial environments.

Available in a variety of colors, it aids in easy identification of cables, making it ideal for complex electrical systems.

Features:

- High electrical insulation
- Flexible and easy to install
- Resistant to oils, chemicals and UV light
- Durable and Reliable

Colors: Black, Blue, Red, Yellow, Green (0.5-12mm ID), Black (>12 mm ID)

Application:

- Electrical Panels & Automobiles Industries,
- Specially Wiring Harness for Electrical & Electronic Industry.
- Telecom Industry and Submersible pump manufacturing.
