

# Pulse Valves

## Pilot Operated Pulse Valve

Design to redefine dust collector. They are treasured among the clients for its exceptional attributes and durable performance.

## Drain Valve For Air Compressor Condensate

**PHOENIX** Dust Collector valves have been specially designed for use in dust collector systems. The high-flow fast-opening 2-way valves are used for pulsing large volumes of air into filter bags for particulate removal.

### Features

- Specially designed for reverse jet-type dust collector systems
- High flow Cv(s) to 140 for effective bag cleaning
- High cycle life
- Fast opening/closing

**Pressure Range :** 0.5 To 8.5 Bar

**Temperature :** Up to 90 C

**Media :** Air

**Operating voltages :** AC: 24, 110, 220  
DC: 12, 24

### Construction

**Body :** Aluminium Die Cast

**Seal :** NBR

**Diaphragm :** NBR

**Ambient Temperature :** -18°C to 85°C

## Auto Drain Valve

**PHOENIX** Auto Drain Valves are timer based automatic drain valves. Draining of Compressed air equipment such as Air Receivers, Moisture Separators, Filters, etc. is commonly done by low cost, timer - operated Auto Drain Valves. While these are effective in their functioning, they will open at the set time for condensate to be drained out.
