

SPRING BALANCER

To reduce Operator fatigue and to increase Efficiency

- Rugged Construction
- Containerized Main Spring
- Self Lubricating Bearing
- Quick Connecting and Disconnecting of load
- Automatic Drum Lock Arrangement
- External Tension Adjustment
- Swivel hook for any Operating Angle

SPRING BALANCER

→ used to suspend hand tools, power tools, hose assemblies etc. in order to increase safety and provide more comfort at the workstation. The load capacity of a **spring** neutralises the weight of a suspended device thus allowing the operator to move it without effort.
